

Pacific Test Equipment March 2018 Newsletter

Welcome to our first Newsletter for 2018

It is March already! We have been busy over the holidays, especially with customers upgrading their test equipment or servicing and calibrating their equipment ready for 2018.

If you are still looking for some new test instruments or need yours serviced or calibrated, please give us a call to book it in.

New Earth Tester - Sonel MRU-120HD

We are delighted to announce a new product for 2018 made especially for our Australian customers.

Pacific Test Equipment is a leader in earth testing and our customers have asked for a robust earth tester with all the multifunction features of the top line models but without the top line price!

Sonel has responded with the new MRU-120HD Earth Tester, specially developed to our specification and is now in stock ready for delivery.

Like our other earth testers, the MRU-120HD is fully customisable with, clamps, test reels, stakes and carry bags from Pacific Test Equipment's extensive range.

If you are in the market for a top quality earth tester, ask us for a price on the MRU-120HD, but please be sitting down because you will be astounded with how much earth tester your money will buy!

Kind Regards, Keith Bensley

MARCH 2018 OFFER

Buy a Sonel or AEMC 5kv or 10Kv Insulation tester or earth tester and get a complimentary Pacific Test Equipment carry bag as part of your purchase (valued at \$169.00 ex GST).

New from DV-Power

Another new product for 2018 is the handheld DV-Power RMO-H micro-ohmmeter.

This is the first battery powered handheld micro-ohmmeter with a test current of up to 300 Amps!

It is all possible with the latest Lithium Polymer (LiPo) battery, the type used in drones and can make around 960 tests from one battery charge.

If all this sounds good, you will be impressed with its accuracy of 0.1% and its weight of less than 1kg!

Call us now and be one of the first in Australia to experience the latest in micro-ohmmeters.
